

REMARKS/ARGUMENTS

Claims 1 to 15 are current in the application.

A terminal disclaimer in respect of US 6,238,033 accompanies this response.

The Applicant has proposed amendments to claims 1 and 9, being the independent claims, to specifically recite that the camera includes a print roll, a printer, a cutter for severing a printed image from the print roll and a counter for cutting the number of images printed. The claims further recite that the replenishment of the camera includes replacing the print roll and resetting the counter.

Claims 1 to 15 stand rejected under 35 USC 103(a) as being unpatentable over Zander in view of Cosgrove. As discussed in the response to the previous Office Action, Zander relates to conventional film cameras whereas Cosgrove relates to conventional digital cameras. Neither Zander nor Cosgrove teach a digital camera incorporating a printer. Neither Zander nor Cosgrove teach a printer having a supply of print media and a cutter for severing a printed image from the print roll. Neither Zander nor Cosgrove teach a camera in which the cutter associated with the print roll has a counter for counting the number of printed images. Neither Zander nor Cosgrove teach replenishing a camera having a printer by replacement of the print roll. Neither Zander nor Cosgrove teach replenishing a camera by resetting the counter associated with the cutter of the print roll.

In light of these distinctions, Applicant respectfully submits that the invention defined in the amended claims is distinguished from Zander and Cosgrove, either in isolation or in combination. Applicant further submits that the amendments made and the arguments presented herein are fully responsive to the issues raised in the Office Action. Applicant further submits that the amendments and arguments introduce no new issues for the Examiner to consider and clearly place the application in order for allowance. Accordingly, further consideration of the application is respectfully requested.

Very respectfully,

Applicant:
